### Endangered Species List Review

Today's date	<input type="text" value="5/29/2012"/>
Name	<input type="text" value="Brian Klein"/>
Company	<input type="text" value="U.S. Capitol Power Plant, Architect of the Capitol"/>
street address	<input type="text" value="25 E Street S.E."/>
county	<input type="text"/>
city, state, zip	<input type="text" value="Washington, D.C. 20003"/>
email	<input type="text" value="bklein@aoc.gov"/>

My project is *not* located on one of the quad maps on the Chesapeake Bay Field Office web site.

Please send the endangered species and critical habitats list review to me at either the address above, or email a response. If additional information is required, please call me.

#### Project Location:

Street name	<input type="text" value="25 E Street S.E."/>
City, state, zip	<input type="text" value="Washington, D.C. 20003"/>

#### Proposed Construction/ Refurbishment Activity:

*(Example: The proposed project is to build 100 rental units to replace apartments that were razed. This is Phase I of a larger residential development.)*

The Capitol Power Plant provides heating and cooling to a variety of buildings at the US Capitol Complex. The proposed action by EPA (i.e., issuance of a PAL permit) would allow the Capitol Power Plant to add/modify emissions units (primarily involving the installation of combined cycle combustion turbines at the existing plant) without being subject to federal Prevention of Significant Deterioration permitting.

Specifically, the Capitol Power Plant is seeking a PAL permit for emissions of particulate matter less than 10 microns in diameter (PM<sub>10</sub>), Nitrogen Dioxide (NO<sub>2</sub>), and greenhouse gases (GHGs) pursuant to 40 CFR 52.21(aa). So long as the Capitol Power Plant complies with PAL permit terms, the facility will not be subject PSD permitting requirements for these pollutants. Enclosed are photographs (optional), either a location map or current topographic map, or a site map of the subject property.
